Xero Health Check: What We Cover

SERVICE TWO — DETAIL

The Health Check is designed for businesses that are already using Xero but are unsure whether everything is correct or working efficiently. It is particularly useful if you inherited a Xero file from someone else, if your reports contain figures you do not understand, or if you want a second opinion before VAT or year-end. The service identifies issues and provides recommendations — it does not include completing corrections within your Xero file. Where significant corrections are needed, Xero Health Check & Fixes may be more suitable.

We Review the Set-Up

We check organisation settings, bank accounts, VAT configuration, chart of accounts and connected tools for accuracy.

3

We Produce a Report

You receive a focused report explaining what needs attention, what to prioritise and the recommended next steps.

We Walk You Through It

We explain the findings, answer your questions and make sure the next steps are completely clear before we finish.
